🌐 [amjad-a-9b4172178](#)

📍 Saudi Arabia, Madinah

Software Developer with a Master's degree in Computer Science and hands-on experience in frontend development, Java backend development, and blockchain applications. Passionate about building scalable software, solving real-world problems, and continuously learning modern technologies. Interested in Backend Development, AI, and Web Technologies.

Experience

Elm Company

Nov 2025 - Present

Trainee in frontEnd web development.

- Hands-on experience in building modern, responsive web applications using Angular, TypeScript, and Tailwind CSS, with an emphasis on best practices and user experience.

Blockchain Developer

2021 - 2024

Taibah Valley, Saudi Arabia

- Analyse requirements for Lafeef & Hawia projects
- UI implementation for Hawiya NFT marketplace & Lafeef projects
- Designed and executed test scenarios to improve application quality and usability.
- Prepared and presented a workshop about some blockchain topic
- Test, implement, and integrate smart contracts with the front end
- Took an online course to learn more about blockchain development
- Participated in the process of staking Tezos nodes
- Participated in the software design process
- Assisted the corporate communication manager in managing the social media blockchain account
- Prepared and delivered training courses about Ethereum & solidity

Artificial Intelligence Trainee:

2021

Skills Academy, IBM

- Develop AI solutions and employ machine learning algorithms with IBM Watson
- Learning advanced topics such as AI, Natural Language Processing (NLP), and chatbots
- Experience with debugging and building AI applications

Education

Taibah University

2023 - 2025

- Master of Science, Computer Science
- GPA: 4.93
- Research project: Enhancing vulnerability detection in Solidity Smart Contracts using LLMs, specifically GPT-3.5, LLaMA-3, and DeepSeek R1, using prompt-based techniques.

Taibah University

2016 - 2021

- Bachelor of Science, Computer Science
- GPA: 4.96
- Graduation project: Automatic Rater for Text-Based Job Interview (ARTJI), which is aimed to develop a text-based conversational interview supported with an automated scoring schema for the applicant evaluation

Publication

- Published at International Conference on Advanced Innovation in Smart Cities (ICAISC2025), under the title "Comparative Analysis of Large Language Models in Solidity Smart Contract Vulnerability Detection: Review", Due Date 9-11 Feb, 2025, Jeddah
- Published to Journal of Artificial Intelligence and Technology under the title "Comparative Analysis of three Large Language Models in Solidity Smart Contract Vulnerability Detection".

Key skills

- LANGUAGES | Java, Python, JavaScript, C++, HTML & CSS, Solidity
- FRAMEWORKS | Bootstrap, ReactJS, Nextjs, Angular, Tailwind CSS, Truffle
- DATABASE | MongoDB, SQL, liteSQL
- TOOLS | NetBeans, Jupyter Notebook, Visual Studio Code, Git, Remix IDE, Ganache, IntelliJ IDEA

Soft skills

- Self-learning
- Application Design
- Coding
- Problem-solving
- Content Creation
- Time Management
- Communication Skill
- Error Handling
- Eye for Detail
